Incredible Chemistry of Plants

Mr. Chad Huckabee – Texas Master Naturalist

Ever wonder why a plant smells good or smells bad? Or how some plants seem to adapt to specifically attract or even repel certain insects? Did you ever wonder why some plant leaves are hairy, while some are smooth; why some plants have thorns or spines, and some do not?

Come explore the fascinating topic of plant chemistry. Plants can automatically synthesize a mind-boggling variety of chemicals. Humans use this amazing property to enhance our foods, treat illnesses and enact acts of violence even against other humans.

Chad Huckabee is a former science educator, an avid outdoors enthusiast and the past president of the local Texas Master Naturalist chapter.

- Class size limited to 24 participants.
- This program is FREE of charge and open to individuals and families.
- Walk-ins are welcome on a first come first served basis.
- This program is for individuals and families with children ages 12 and older.
- To reserve a space, please register at <http://register.ccparkandrec.com>.
