Harte Research Institute – Geospatial Lab

Presenters: Michelle Culver and Claire Rydman

Texas A&M University-Corpus Christi graduate students will share about their work at the Harte Research Institute.

Treasure maps are not just for pirates! Not only can you use a map to find something, like a treasure, but maps can also be used to discover a hidden pattern or to learn more about our surroundings. The Coastal and Marine Geospatial Lab researchers create and use maps to solve problems and address unanswered questions about the Gulf of Mexico coastline. Come and learn about how these researchers use maps to discover new information about sea turtle habitat and to find ways to protect us from storms and sea level rise. Participants will use a map to find hidden treasures throughout the preserve, discovering fun facts about maps and wetlands along the way.

- Program is free and designed for ages 6 and up.
- Online registration is required at <http://register.ccparkandrec.com>.

For more information, contact Caleb Harris at (361) 826-3947 or calebh@cctexas.com.

Meet at the Oso Bay Wetlands Preserve & Learning Center located at
